Email: ashishgarud539@gmail.com
Mobile: +91-9067557760

SKILLS

Languages: Python, Java, C/C++, HTML, CSS, JavaScript, PL/SQL
Frameworks: Streamlit, Pytorch, TensorFlow, Fast API, Dash, React, Flask
Tools/Platforms: MySQL, Firebase, Git, Docker, Hadoop, Spark, Power BI, Tableau, n8n, Linux
Soft Skills: Problem-Solving, Team Collaboration, Adaptability

INTERNSHIP

Edunet AICTE - Virtual Internship | [Link](#) Jun' 25-Aug' 25
Python Developer Intern

- Established metrics-driven applications with focus on intelligence pipeline debugging and optimization
- Implemented input validation and anomaly detection techniques for comprehensive quality assurance
- Built engaging statistics dashboards and visualizations applying Python libraries
- Integrated ML models via APIs and operationalized security and validation protocols

Tech Stacks Used: Python, Streamlit, Flask, ML APIs, Data Visualization Libraries

PROJECTS

Agentic Code Debugger Agents | [GitHub](#) Feb' 26-Mar' 26

- Created an Agentic Bug Hunter that autonomously invokes MCP Search Tools to gather documentation context, enabling AI-driven bug detection across code samples with self-correcting JSON parsing to handle malformed LLM outputs.
- Integrated graceful failure handling with a connection-state flag that suppresses cascading MCP errors and falls back seamlessly.
- Executed in-memory batch processing with strict sequence preservation and regex-based text sanitization, optimizing output integrity and producing clean, Excel-compatible CSV reports.

Tech: Python, Next.js (TypeScript), MCP Protocol, OpenRouter API, Regex

Padhega - Educational Platform | [GitHub](#) Jun' 25-Aug' 25

- Refined a student-centric educational platform with interactive learning modules facilitating personalized learning experiences.
- Optimized progress tracking and student collaboration tools enhancing engagement and learning outcomes.
- Utilized Firebase for real-time information synchronization and user authentication augmenting seamless user experience.

Tech: React, TypeScript, JavaScript, Firebase, Real-time Database

Google Play Store Analysis and Prediction | [GitHub](#) May' 25-Jul' 25

- Architected a predictive model analyzing app success factors using Python and Random Forest algorithms, achieving accurate predictions of ~94% for app performance metrics.
- Engineered dynamic visualizations and deployed as a web application capitalizing on Streamlit, enabling users to explore app trends and patterns.
- Automated sentiment analysis capabilities providing comprehensive insights into user reviews and app ratings.

Tech: Python, NLP, Random Forest, Streamlit, Data Visualization

CERTIFICATES

- Data Engineering Course | [GeeksForGeeks](#) Aug' 25
- Cloud Computing Course | [NPTEL](#) Jul' 25
- Complete Java Course | [Neocolab](#) May' 25
- Data Structure and Algorithm | [Neocolab](#) Dec' 24

ACHIEVEMENTS

- Infineon Agentic AI Hackathon Winner:**
Won the Infineon Agentic AI debugger Hackathon with the cash prize of 10,000.
- One among Dean's top 10% students at the University:**
Dean's Top 10% Honoree - Selected among the top 10% of students for academic excellence
- Solved 400+ LeetCode Problems:**
400+ LeetCode Problems Solved - Demonstrated strong algorithmic thinking and problem-solving skills

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering | **CGPA: 8.54** Aug' 23-Present

Chhatrapati Shivaji Junior Science College Jalgaon, Maharashtra
Intermediate | Percentage: 80% Apr' 21-Jun' 23

L. H. Patil English Medium School Jalgaon, Maharashtra
Matriculation | Percentage: 92% Mar' 21
